

- **Staff-level product designer** shipping AI-assisted workflows, data/analytics tools, and design systems across **Microsoft, Meta, IBM, Apple, and startups**.
- Specialize in turning **complex systems** into simple, **durable interfaces**: notebooks, alerts, insights, and enterprise data tooling.
- Known for **design-to-engineering fluency** (React/TS, data-viz, prototyping) and for **codifying patterns** teams can scale.

Working Experience

Sleeping Ox Studios – Seattle, WA (WFH / In Person)

Staff Product Designer (Consulting)

11/2023 – Present

- i2Systems – Building out a Storybook/component framework alongside demos and interaction implementation for an American based lighting manufacturer.
- LegalAISTartup – Led design efforts across a dual-brand **legal and enterprise AI platform**, using **Figma and production-level React/CSS** to build and ship scalable interfaces.
- Corporate Infra – Laid out Data Suite Figma design system, unifying brand identity across marketing and product teams to support rapid iteration.
- HR AI Startup – Similar for HR private data, with next step questions and better history guidance for private users.
- Implemented **responsive UI** fixes and improvements across **web and mobile, enhancing accessibility and device consistency** both in Figma and code.
- Design & tested novel AI-driven patterns for legal and hr workflows, including **tokenized conversational UI and contextual tab-switching** for white-collar task automation.

Meta – Seattle, WA (WFH / Seattle)

Staff Product Designer

11/2020 – 11/2023

- **Led design for analysis workflows** across internal data tools, including dashboarding, notebooks, and data preparation areas; impacting every Meta workers problem solving.
- Directed design and development improvements for the **Data Visualization Design System** within XDS, enhancing internal design standards.
- Unified notebook designs across various internal product spaces through Figma wireframes, prototypes, and coded examples and connection with XFN.
- Actively **presented for workplace initiatives**, including research events, internal conferences, and addressing design challenges to support a broad range of analysis tools.
- Focused on LLM, natural language workflows for data visualization and AI driven insight discovery, enhancing user interaction across a range of internal spaces.

Microsoft – Seattle, WA

Senior Product Designer

02/2017 – 11/2020

- Led end-to-end design for analytics features across **Microsoft 365, including Office and Teams**, driving workplace collaboration now on millions of computers.
- **Managed and onboarded sets 8 designers (4 full-time with a new manager, 4 contract during a stay)**, overseeing planning, feedback loops, and career development.
- Designed and shipped **new admin portal features for Microsoft Teams**, enhancing organizational visibility and communication workflows.
- **Built a design system and style guide for MyAnalytics and Workplace Analytics (precursors to Viva Insights)**, aligning cross-product UX.
- Produced **responsive UI concepts, wireframes, and production-ready prototypes**, translating insights into high-fidelity experiences.
- Partnered closely with **product managers and engineers** to prioritize features and ensure seamless delivery across platforms.
- Championed design excellence across Microsoft via **hackathons, internal conferences, international research with key stakeholders, and onboarding initiatives**.

IBM – Austin, TX

Product Designer / Front End Developer

03/2013 – 02/2017

- Key contributor to IBM's enterprise design transformation, helping shift the **designer-to-engineer ratio from 1:100 to 1:8 and scaling UX practice** across the company.
- Designed and shipped high-impact features across **Watson Data Platform, Watson Analytics, and Cognos BI**, integrating data-heavy interfaces with consistent UX.
- Co-led early development of the **Carbon Blue design system**, defining foundational components and scaling adoption across IBM's product suite.
- Built interfaces for **machine learning and data visualization tools** tracking social media sentiment and trend analysis.
- Directed **multi-stage product redesigns** from discovery to launch, aligning product, engineering, and design stakeholders across delivery cycles.
- Championed design culture through **mentorship, internal talks, and active participation in recruiting**, growing IBM's design talent pipeline.

Education

University of Michigan – Ann Arbor, MI

Research Assistant

05/2011 – 05/2013

- Collaborated with faculty in Information Science and Architecture on cross-disciplinary projects involving **3D modeling, rendering, HCI prototyping, and spatial computing**.
- Researched on the use of HCI and 3D design in robotic manufacturing and built environment systems, contributing to public-facing interactive demos and educational tools.

Apple – Cupertino, CA

User Experience Researcher & Designer

04/2012 – 08/2012

- Designed and prototyped early-stage concepts for internal Apple tools, including a **meeting room reservation system, an App Bundle feature for the App Store, and accessibility-focused experiences**.
- Collaborated with senior Apple designers and researchers, including the original iOS app creator and Siri's design lead, contributing to the Internal Services & Technology team's future-forward design initiatives.

MS, Information Science, Human-Computer Interaction

— University of Michigan, Ann Arbor, MI

2012 – 2013

MS, Architecture work (M.Arch partial and M.Sci. Arch Digital Fabrication)

— University of Michigan, Ann Arbor, MI

2011 – 2012

BS, Mechanical Engineering & Technical Comms (2 degrees), also a Jazz Piano Minor

— Michigan Technological University, Houghton, MI

2004 – 2009

Select Speaking: ConveyUX 2017 (Enterprise Design Guides); Frontporch.io 2016 (Enterprise Design Guides); SXSW 2014 (Interaction Design Meets Architecture Design)

Patents: US20190259298A1 - Systems, methods, and software for implementing a behavior change management program, contributor
